DagSwap

Decentralized Trading At Lightning Speed

Revolutionizing the DeFi market with BlockDAG technology

The Problem

The Promise Of DeFi Clashes With Reality

Slowness, high fees during usage peaks, and complex interfaces create a poor experience and prevent decentralized finance from reaching its true potential for adoption and efficiency.

© 2025 ParkourDevs x Infty Global — Proprietary

Our Solution

We process parallel transactions confirmations in 1 to 2 seconds, offering a very user-friendly interface while keeping fees low and predictable.

Finally a fast, easy, and economical DeFi protocol.

Key Features

SPEED & EXPERIENCE

Parallel Transaction Processing

Ultra-Low Latency

Intuitive User Interface

CAPITAL & FEES

Improved Capital Efficiency

Lower fees

TRADITIONAL AMM (X * Y = K)

SEQUENTIAL PROCESSING

GLOBAL STATE UPDATE

INEFFICIENCY DURING HIGH DEMAND

HIGHER SLIPPAGE

DAGSWAP PO-CPMM:

PARALLEL PROCESSING

STATE PARTITIONING

CONSTANT PERFORMANCE

OPTIMIZED LIQUIDITY ROUTES

This revolutionary architecture allows BlockDAG DEX to process multiple trading operations simultaneously, eliminating the bottlenecks that plague traditional DEXs.
